In Association with
Department of B.com Accounting and Finance
Academic Year 2022-23
Report on

“Faculty Development Program on Research Methods and Data Analysis for Successful Start up”

Two days Faculty Development Program (FDP) was organized by the Innovation and Entrepreneurship Cell in association with the Department of B.com Accounting and Finance (BAF), on Research Methods and Data Analysis for Successful Startups from 23rd Aug 2022 to 24th Aug 2022. FDP was attended by thirty beneficiaries from various departments of the institute. Research methods and data analytics have become an integral part of almost all areas of management, social sciences, and humanities research. Advancement in computing technology has further raised the importance of data analytics and placed great demands on its applications to complex decision-making problems. With the availability of various data analytical techniques and user-friendly analytical software such as SPSS Basic and SPSS Modeler, the ability to analyze large amounts of data is not only desirable but a necessity for academicians and researchers. The current FDP addressed the issues in research methods and data analytics like the selection of appropriate analytical tools, the right software, interpretation of outputs, and effective report writing. This FDP provided hands-on sessions on learning basic statistical tools and techniques for different research objectives and carrying out data analysis using MS Excel and SPSS (Statistical Package for Social Science).
