“Seminar on Intellectual Property Rights, 17 Aug 2022, Time: 11:00am

Intellectual property rights are the rights given to persons over the creations of their minds. They usually give the creator an exclusive right over the use of his/her creation for a certain period of time. Since, it is the rights granted to the creators of intellectual property and includes trademarks, copyrights, patents, industrial design rights, jurisdictions and trade secrets. Rather than protecting possessions, intellectual property law protects exclusive rights to use or reproduce the intellectual property (IP). The main objective of intellectual property law is to encourage innovation and granting protection to inventors that will allow them to recover research and development (R & D) investments and reap the benefits of their inventions for a limited period of time.
